

(3) *Mackerel recreational sector EEZ closure.* NMFS shall close the recreational mackerel fishery in the EEZ when the Regional Administrator determines that recreational landings have exceeded the RHL. This determination shall be based on observed landings and will not utilize projections of future data.

(4) *Mackerel recreational landings overage repayment.* If the mackerel ACL is exceeded, and the recreational fishery landings are responsible for the overage, then landings in excess of the RHL will be deducted from the RHL for the following year, as a single-year adjustment.

(5) *Non-landing AMs, by sector.* In the event that the ACL is exceeded, and that the overage has not been accommodated through other landing-based AMs, but is attributable to either the commercial or recreational sector (such as research quota overages, dead discards in excess of those otherwise accounted for in management uncertainty, or other non-landing overages), then the exact amount, in pounds, by which the sector ACT was exceeded will be deducted from the following year, as a single-year adjustment.

(6) *Mackerel ACL overage evaluation.* The ACL will be evaluated based on a single-year examination of total catch (landings and discards). Both landings and dead discards will be evaluated in determining if the ACL has been exceeded. NMFS shall make determinations about overages and implement any changes to the ACL, in accordance with the Administrative Procedure Act, through notification in the FEDERAL REGISTER, by March 31 of the fishing year in which the deductions will be made.

(c) *Butterfish AMs—(1) Butterfish EEZ closure.* NMFS shall close the directed butterfish fishery in the EEZ when the Regional Administrator projects that 80 percent of the butterfish DAH has been harvested. The closure of the directed fishery shall be in effect for the remainder of that fishing year, with incidental catches allowed as specified at § 648.26.

(2) *Butterfish ACL overage repayment.* If the butterfish ACL is exceeded, then catch in excess of the ACL will be de-

ducted from the ACL the following year, as a single-year adjustment.

(3) *Butterfish mortality cap on the longfin squid fishery.* NMFS shall close the directed fishery in the EEZ for longfin squid when the Regional Administrator projects that 80 percent of the butterfish mortality cap has been harvested in Trimester I, and/or when 90 percent of the butterfish mortality cap has been harvested in Trimester III.

(4) *Butterfish ACL overage evaluation.* The ACL will be evaluated based on a single-year examination of total catch (landings and discards). Both landings and dead discards will be evaluated in determining if the ACL has been exceeded. NMFS shall make determinations about overages and implement any changes to the ACL, in accordance with the Administrative Procedure Act, through notification in the FEDERAL REGISTER, by March 31 of the fishing year in which the deductions will be made.

(d) *Notification.* Upon determining that a closure is necessary, the Regional Administrator will notify, in advance of the closure, the Executive Directors of the MAFMC, NEFMC, and SAFMC; mail notification of the closure to all holders of mackerel, squid, and butterfish fishery permits at least 72 hours before the effective date of the closure; provide adequate notice of the closure to recreational participants in the fishery; and publish notification of closure in the FEDERAL REGISTER.

[76 FR 60619, Sept. 29, 2011, as amended at 76 FR 68656, Nov. 7, 2011; 77 FR 16480, Mar. 21, 2012]

**§ 648.25 Atlantic Mackerel, squid, and butterfish framework adjustments to management measures.**

(a) *Within season management action.* The MAFMC may, at any time, initiate action to add or adjust management measures within the Atlantic Mackerel, Squid, and Butterfish FMP if it finds that action is necessary to meet or be consistent with the goals and objectives of the FMP.

(1) *Adjustment process.* The MAFMC shall develop and analyze appropriate management actions over the span of at least two MAFMC meetings. The MAFMC must provide the public with

advance notice of the availability of the recommendation(s), appropriate justification(s) and economic and biological analyses, and the opportunity to comment on the proposed adjustment(s) at the first meeting and prior to and at the second MAFMC meeting. The MAFMC's recommendations on adjustments or additions to management measures must come from one or more of the following categories: Adjustments within existing ABC control rule levels; adjustments to the existing MAFMC risk policy; introduction of new AMs, including sub-ACTs; minimum fish size; maximum fish size; gear restrictions; gear requirements or prohibitions; permitting restrictions, recreational possession limit; recreational seasons; closed areas; commercial seasons; commercial trip limits; commercial quota system, including commercial quota allocation procedure and possible quota set-asides to mitigate bycatch; recreational harvest limit; annual specification quota setting process; FMP Monitoring Committee composition and process; description and identification of EFH (and fishing gear management measures that impact EFH); description and identification of habitat areas of particular concern; overfishing definition and related thresholds and targets; regional gear restrictions; regional season restrictions (including option to split seasons); restrictions on vessel size (LOA and GRT) or shaft horsepower; any other management measures currently included in the FMP, set aside quota for scientific research, regional management, and process for inseason adjustment to the annual specification. Measures contained within this list that require significant departures from previously contemplated measures or that are otherwise introducing new concepts may require amendment of the FMP instead of a framework adjustment.

(2) *MAFMC recommendation.* After developing management actions and receiving public testimony, the MAFMC shall make a recommendation to the Regional Administrator. The MAFMC's recommendation must include supporting rationale, if management measures are recommended, an analysis of impacts, and a recommendation

to the Regional Administrator on whether to issue the management measures as a final rule. If the MAFMC recommends that the management measures should be issued as a final rule, the MAFMC must consider at least the following factors, and provide support and analysis for each factor considered:

(i) Whether the availability of data on which the recommended management measures are based allows for adequate time to publish a proposed rule, and whether the regulations would have to be in place for an entire harvest/fishing season.

(ii) Whether there has been adequate notice and opportunity for participation by the public and members of the affected industry in the development of the recommended management measures.

(iii) Whether there is an immediate need to protect the resource.

(iv) Whether there will be a continuing evaluation of management measures following their implementation as a final rule.

(3) *NMFS action.* If the MAFMC's recommendation includes adjustments or additions to management measures and, after reviewing the MAFMC's recommendation and supporting information:

(i) If NMFS concurs with the MAFMC's recommended management measures and determines that the recommended management measures should be issued as a final rule based on the factors specified in paragraph (a)(2) of this section, the measures will be issued as a final rule in the FEDERAL REGISTER.

(ii) If NMFS concurs with the MAFMC's recommended management measures and determines that the recommended management measures should be published first as a proposed rule, the measures will be published as a proposed rule in the FEDERAL REGISTER. After additional public comment, if NMFS concurs with the MAFMC recommendation, the measures will be issued as a final rule in the FEDERAL REGISTER.

(iii) If NMFS does not concur, the MAFMC will be notified in writing of the reasons for the non-concurrence.

(4) *Emergency actions.* Nothing in this section is meant to derogate from the authority of the Secretary to take emergency action under section 305(e) of the Magnuson-Stevens Act.

(b) [Reserved]

[76 FR 60620, Sept. 29, 2011, as amended at 76 FR 68656, Nov. 7, 2011; 76 FR 81848, Dec. 29, 2011]

**§ 648.26 Mackerel, squid, and butterflyfish possession restrictions.**

(a) *Atlantic mackerel.* (1) A vessel must be issued a valid limited access mackerel permit to fish for, possess, or land more than 20,000 lb (9.08 mt) of Atlantic mackerel from or in the EEZ per trip, provided that the fishery has not been closed because 90 percent of the DAH has been harvested, as specified in § 648.24(b)(1)(i).

(i) A vessel issued a Tier 1 Limited Access Mackerel Permit is authorized to fish for, possess, or land Atlantic mackerel with no possession restriction in the EEZ per trip, and may only land Atlantic mackerel once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours, provided that the fishery has not been closed because 95 percent of the DAH has been harvested, as specified in § 648.24(b)(1)(i).

(ii) A vessel issued a Tier 2 Limited Access Mackerel Permit is authorized to fish for, possess, or land up to 135,000 lb (61.23 mt) of Atlantic mackerel in the EEZ per trip, and may only land Atlantic mackerel once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours, provided that the fishery has not been closed because 95 percent of the DAH has been harvested, as specified in § 648.24(b)(1)(i).

(iii) A vessel issued a Tier 3 Limited Access Mackerel Permit is authorized to fish for, possess, or land up to 100,000 lb (45.36 mt) of Atlantic mackerel in the EEZ per trip, and may only land Atlantic mackerel once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours, provided that the fishery has not been closed because 90 percent of the Tier 3 allocation has been harvested, or 95 percent of the DAH has been harvested, as specified in § 648.22(b)(1)(i) and (ii).

(iv) A vessel issued an open access mackerel permit may fish for, possess, or land up to 20,000 lb (9.08 mt) of Atlantic mackerel in the EEZ per trip, and may only land Atlantic mackerel once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours.

(v) Both vessels involved in a pair trawl operation must be issued a valid mackerel permits to fish for, possess, or land Atlantic mackerel in the EEZ. Both vessels must be issued the mackerel permit appropriate for the amount of mackerel jointly possessed by both of the vessels participating in the pair trawl operation.

(2) *Mackerel closure possession restrictions.* (i) *Commercial mackerel fishery.* During a closure of the commercial Atlantic mackerel fishery, including closure of the Tier 3 fishery, vessels issued a Limited Access Mackerel Permit may not fish for, possess, or land more than 20,000 lb (9.08 mt) of Atlantic mackerel per trip at any time, and may only land Atlantic mackerel once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours.

(ii) [Reserved]

(b) *Longfin squid.* During a closure of the directed fishery for longfin squid vessels may not fish for, possess, or land more than 2,500 lb (1.13 mt) of longfin squid per trip at any time, and may only land longfin squid once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours. If a vessel has been issued a longfin squid incidental catch permit (as specified at § 648.4(a)(5)(ii)), then it may not fish for, possess, or land more than 2,500 lb (1.13 mt) of longfin squid per trip at any time and may only land longfin squid once on any calendar day.

(c) *Illex.* During a closure of the directed fishery for *Illex*, vessels may not fish for, possess, or land more than 10,000 lb (4.54 mt) of *Illex* per trip at any time, and may only land *Illex* once on any calendar day, which is defined as the 24-hr period beginning at 0001 hours and ending at 2400 hours. If a vessel has been issued an *Illex* incidental catch permit (as specified at § 648.4(a)(5)(ii)), then it may not fish for, possess, or land more than 10,000 lb (4.54 mt) of
